RE: Letter of Recommendation

To Whom It May Concern:

Over the past couple of years Engineered Automation Systems, Inc. (EASI) has evaluated several bullet resistant glazing products and found the WinTec solution to be unique and effective in both their chemical process and application requirements.

The product received high reviews from a demonstration performed by a highly decorated Police Department and Special Weapons and Tactics (SWAT) division. It was proven during the exhibition that the glass, which was protected by the WinTech solution, was more effective due to the application of a combination film with proprietary polymer and the unique installation requirements.

It has been proven that your product is worthy of our personal endorsement and has been recommended and installed on several projects to date.

If you have any questions or concerns please feel free to contact me anytime.

Sincerely,

A handwritten signature in black ink, appearing to read 'G. W. Brandon', written over a white background.

Gregory W. Brandon
