

# School Shooting in Uvalde, Texas, Prompts C-Bond Systems (a Texas-Based Company) to Implore Schools to Use its Ballistic-Resistant Film System to Help Protect Against Active Shooters

C-Bond Systems' bullet-resistant film system is validated by an independent third-party laboratory to provide National Institute of Justice (NIJ) Level I, Level IIA, Level II, and Underwriters Laboratories (UL) 752 ballistic-resistant protection, and has been installed in numerous schools in Texas to date

HOUSTON, May 25, 2022 (GLOBE NEWSWIRE) -- Given yesterday's school shooting in Uvalde, TX, <u>C-Bond Systems</u>, <u>Inc.</u> ("C-Bond" or "Company") (OTC: CBNT), a nanotechnology solutions company, is imploring schools to use its ballistic-resistant window film system, C-Bond BRS, to help protect students and staff against active shooters. C-Bond has installed its safety and security film products at more than 100 locations in Texas.

<u>C-Bond BRS</u> is a ballistic-resistant film system that consists of the patented C-Bond glass strengthening technology and security film. The C-Bond technology chemically bonds to the defects randomly distributed on the glass surface to increase impact resistance and prevent breakage. The combination of the C-Bond technology combined with multiple layers of security film have been validated by an independent third-party laboratory to provide National Institute of Justice (NIJ) Level I, Level IIA, Level II, and Underwriters Laboratories (UL) 752 ballistic-resistant protection.

"This school shooting in Uvalde, Texas, serves as another painful reminder of the need to protect schools from active shooters," said Scott R. Silverman, Chairman and CEO of C-Bond. "While we cannot completely prevent these horrible acts from happening, we can be a part of the overall solution to better protect students and staff."

"Unfortunately, active shooter incidents show no signs of slowing – they are increasing at an alarming rate according to new FBI statistics," continued Silverman. "With this most recent, horrific school shooting occurring in our home state, we are urging schools to increase security measures, including the installation of C-Bond BRS, which is proven to stop bullets."

Active shooter incidents in 2021 surged by more than 50 percent from 2020 and nearly 97 percent from 2017, according to new <u>FBI statistics</u> released earlier this week. The report also noted a developing trend of roving active shooters, meaning shooters who open fire in

multiple locations either in a day or in various locations over several days.

Patriot Glass Solutions, a division of C-Bond Systems, protects personal, commercial and government property from looting, rioting, break-ins, and gunfire. Its leading products are C-Bond BRS, a ballistic-resistant film system, and C-Bond Secure, a multi-purpose glass strengthening primer and window film mounting solution that deters forced entry, as well as other types of specialized window film including solar film, graffiti control film, bird strike film, decorative film, and more.

#### **About C-Bond**

C-Bond Systems, Inc. (OTC: CBNT) is a Houston-based nanotechnology company and marketer of the patented and patent-pending C-Bond technology, which is independently proven to strengthen glass in automotive and structural applications. The Company's Transportation Solutions Group sells C-Bond nanoShield, a liquid solution that strengthens automotive windshields, primarily through distributors. The Company's Patriot Glass Solutions sells ballistic-resistant glass solutions and forced entry deterrent solutions to private enterprises, schools, and government agencies, primarily through its majority-owned subsidiary, A1 Glass Coating. The Company also sells MB-10 Tablets and Vimoba Tablets, disinfection products on EPA's List N. ### **Forward-Looking Statements**

Statements in this press release about our future expectations constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and as that term is defined in the Private Litigation Reform Act of 1995. Such forward-looking statements involve risks and uncertainties and are subject to change at any time, and our actual results could differ materially from expected results. These risks and uncertainties include, without limitation, the Company's ability to successfully commercialize its products; the effect of the COVID-19 global pandemic on the Company's and its customers' ability to operate; the Company's and its customers' ability to source materials; the Company's ability to raise capital; potential channel conflicts; as well as other risks. Additional information about these and other factors may be described in the Company's filings with the Securities and Exchange Commission ("SEC") including its Form 10-K filed on April 15, 2022, its Forms 10-Q filed on May 16, 2022, November 15, 2021, and August 16, 2021, and in future filings with the SEC. The Company undertakes no obligation to update or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this statement or to reflect the occurrence of unanticipated events, except as required by law.
