Patriot Glass Showcases Bullet-Resistant Window Film for School Safety

On Monday, Texas lawmakers are set to consider increased school security legislation.

AUSTIN, Texas, April 24, 2023 /PRNewswire/ -- Ahead of the Texas House taking up its omnibus school safety bills on Monday, Patriot Glass by C-Bond Systems demonstrated their cutting-edge bullet-resistant window film at the ALERRT facility in San Marcos on Friday, April 21. School administrators from across Central Texas were given a live demonstration of the technology, which can provide an extra layer of defense in the unthinkable event of a school shooting.

C-Bond Systems' Patriot Glass is designed to reinforce windows using a proprietary technology that makes the glass resistant to gunfire, explosive blasts, and other forms of ballistic threats. The live demonstration showcased the patented solution, used between the glass and each layer of window film, which identifies microscopic flaws in the glass and "heals" them.

"The safety and security of our children and staff is a top priority for all schools," said Scott Silverman, CEO of C-Bond Systems. "We're ready to work hand-in-hand with school officials to ensure they have the best security products on the market. The one-way capability of our patented product stops an attacker's bullets from the outside, while allowing a school security officer to shoot out at the attacker from inside. We believe C-Bond is the only ballistic film on the market that can offer that."

The Texas House is scheduled to hear House Bill 3 and House Bill 13 Monday, two of the biggest comprehensive school security bills this session.
