Patriot Glass Solutions, a Subsidiary of C-Bond Systems, Receives Purchase Order to Install C-Bond Ballistic-Resistant System at CPS Energy Headquarters in San Antonio

This is the second security film project that Patriot Glass Solutions has been awarded for CPS Energy, for a total of more than \$100,000

SAN ANTONIO, March 25, 2024 (GLOBE NEWSWIRE) -- [C-Bond Systems](#) (the "Company" or "C-Bond") (OTC: CBNT), a developer and marketer of glass strengthening solutions for enhanced safety, announced today that its [Patriot Glass Solutions](#) subsidiary has received a purchase order to install its C-Bond BRS (ballistic-resistant system) at CPS Energy's headquarters in San Antonio.

Patriot Glass Solutions also previously installed C-Bond Secure, its forced entry-resistant film system, at the energy company's headquarters. The ballistic-resistant system is being installed in another area of the facility. The total for the two projects is more than \$100,000.

"It is always a good validation of our product, customer service, and installation team when we have a repeat customer," said Michael Wanke, President of Patriot Glass Solutions. "While we often talk about our security and ballistic-resistant products being installed at schools, commercial and government facilities are just as important to our business."

C-Bond, through its [Patriot Glass Solutions](#) subsidiary, markets [C-Bond](#) BRS, a ballistic-resistant film system that includes C-Bond's patented glass strengthening technology, which is applied onto glass prior to the application of window film. Multiple layers of security film on specified glass thickness are then applied to the glass, with the C-Bond chemical solution in between each layer of film, to help stop bullets from penetrating glass. C-Bond BRS is certified by third-party labs to meet National Institute of Justice Level I, Level IIA, Level II, and Underwriters Laboratories (UL) 752 ballistic-resistant protection standards. C-Bond BRS is more affordable than bullet-resistant polycarbonate materials and is easy to install.

Patriot Glass Solutions also offers forced entry-resistant film, applied with its proprietary glass strengthener, called its [C-Bond Secure](#) product. When used in conjunction with security film, C-Bond Secure delays forced entry, which gives law enforcement or other security personnel more time to lead those inside a facility to safety and apprehend the perpetrator.

Patriot Glass Solutions protects personal, educational, commercial and government property

from looting, smash-and-grabs, break-ins, and gunfire.

Forward-Looking Statements

Statements in this press release about our future expectations constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and as that term is defined in the Private Litigation Reform Act of 1995. Such forward-looking statements involve risks and uncertainties and are subject to change at any time, and our actual results could differ materially from expected results. These risks and uncertainties include, without limitation, the Company's ability to successfully commercialize its products; the Company's and its customers' ability to source materials; construction delays; film delays; the Company's ability to raise capital; regulatory risks; as well as other risks. Additional information about these and other factors may be described in the Company's filings with the Securities and Exchange Commission ("SEC") including its Form 10-K filed on March 31, 2023, its Forms 10-Q filed on November 14, 2023, August 14, 2023, and May 15, 2023, and in future filings with the SEC. The Company undertakes no obligation to update or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this statement or to reflect the occurrence of unanticipated events, except as required by law.
