Kevin Waller
Vice President,
Business Development
C-Bond Systems, LLC

Kevin,

It is my pleasure to provide this letter as a testimonial to the C-Bond Systems product and installation process. We have found the product to be one of the best tested and known measures out there that can provide the protection we are seeking. The product developers and support team are extremely knowledgeable about the product specifications as well as the application and installation process. The C-Bond Systems team's installation process was excellent and they provide great support. As this product can be very tedious to install, their teams has done an exceptional job meeting our requirements and ensuring the product is installed to specifications.

Sincerely,

Andre Laliberte
Global Manager, Facility Security
